

Make Your Window Replacement as Hassle-Free as Possible

by Daniel Threlfall

As with any home improvement project, [window replacement](#) runs the risk of a few snags along the way. Your goal, of course, is a hassle-free project that accomplishes exactly what you want it to-beautiful windows with no future problems. How can you achieve a painless, hassle-free and successful window replacement project? Here are a few tips:

1. Plan. Careful planning is your greatest ally. Planning starts with knowing what you want-what kind of windows, style of windows or level of windows. Do you want energy-efficient windows? Research the options and determine what you want. Also, you need to know if (and how) you'll be able to pay for the project at the end. Window replacement projects can cost a pretty penny, so be aware of the total cost and how you're going to afford it.

2. Trust. You need to be able to trust your contractor. It is important that you choose a window replacement contractor who specializes in, or is at least very experienced with window replacement. You should be able to explain to your contractor exactly what you want and how you want it done. Show them your plan and make sure that you have decided upon the cost, time frame and the details of your project. Make sure that the contractor you choose is licensed, bonded and insured.

3. Watch and inspect. As the project continues, keep your eye on things. Ensure that the installation process is proceeding on schedule and keep a watchful eye on the details. When the project is completed, give it a careful inspection. You ought to be satisfied with the final project. Kindly bring any problems or complaints to the owner or foreman.
